subject: Tyre Emissions & Sustainability Asia 2027 - invitation to Mr Alex Kurniawan Edy

---

Dear Mr Alex Kurniawan Edy,

I am writing to you as president of the Rubber Association of Indonesia, and also a fellow expert in rubber and tyre formulations, and to invite you personally to a conference we are organising next March in Bangkok.

Since 2024, Emissions Analytics has been developing a series of conferences called Tyre Emissions & Sustainability, which is dedicated to understanding tyre emissions and the wider environmental impact. The sixth edition takes place in Berlin next month. With the shifting centre of gravity of the industry for final tyres and their components, we are expanding in 2027 with the launch of Tyre Emissions & Sustainability Asia on 11 March, at the Bangkok International Trade & Exhibition Centre. The conference will be co-located with the Global Rubber, Latex and Tyre Expo.

I am in early stages of putting together the programme for Bangkok, and given your experience and role at GAPKINDO, I would like to invite you to be one of the cornerstone speakers.

To give you a flavour of the event, at our conference in California this April, we had speakers from California's Department of Toxic Substances Control, the US Geological Survey, the lead researcher who discovered the link between 6PPD and coho salmon die-off and a number of chemical companies supplying the tyre industry. We are aiming for a similar mix for Bangkok, but with a direct relevance to the local market, regulations and with a particularly focus on the role of rubber.

If this would be of interest to you, I would propose we have a short call to discuss further. If you are unavailable and a colleague would be in a position to present, I would also be happy to discuss.

Kind regards,

Nick Molden.
