Daftar terlampir
di
Tempat

Sehubungan dengan rencana penyampaian masukan resmi Indonesia pada Pertemuan ke-19 IMT-GT *Working Group on Agriculture* (WGAA) yang akan dilaksanakan pada tanggal 22 Juli 2026 di Medan dan salah satu agenda pembahasan adalah terkait proposal Thailand berjudul "*Value-Added Agroforestry Systems for Rubber and Palm Oil under Carbon Credit*", dapat kami sampaikan hal-hal sebagai berikut:

1. Sekretariat Direktorat Jenderal Perkebunan telah menyampaikan tanggapan awal terkait proposal tersebut kepada Biro Kerja Sama Pertanian sebagai *Focal Point* Kerja Sama IMT GT untuk disampaikan lebih lanjut kepada *Center of IMT GT* (CIMT).
2. Untuk memperkuat tanggapan tersebut diperlukan masukan teknis dari direktorat pengampu komoditas terkait, yaitu kesiapan pelaksanaan di lapangan, keterkaitan dengan kinerja dan sasaran strategis Direktorat Jenderal Perkebunan, serta elemen teknis yang perlu tercermin dalam kerangka kerja bersama ("*common framework*") yang akan disusun untu selanjutnya disampaikan sebagai posisi resmi Delegasi RI (DELRI).
3. Sehubungan dengan hal tersebut, kami mengundang Saudara atau perwakilan yang ditunjuk untuk menghadiri rapat koordinasi teknis yang akan diselenggarakan pada:

   Hari/Tanggal : Rabu/ 15 Juli 2026
   Waktu : 09.00 WIB – selesai
   Tempat : BRPM Biogen
   Jl. Tentara Pelajar No.3A, RT.02/RW.7, Menteng, Kota Bogor
   Agenda : Koordinasi Penyusunan Posisi DELRI atas Proposal Thailand

4. Hasil koordinasi ini akan disampaikan kepada Biro Kerja Sama Pertanian selaku *focal point* Indonesia untuk IMT-GT dan sebagai dasar penyusunan posisi resmi DELRI pada Pertemuan ke-19 WGAA. Terlampir kami sampaikan agenda kegiatan dan proposal Thailand untuk di pelajari lebih lanjut.

Dokumen ini telah ditandatangani secara elektronik menggunakan sertifikat elektronik
yang diterbitkan oleh Balai Besar Sertifikasi Elektronik (BSrE), Badan Siber dan Sandi Negara (BSSN).

Kami mohon peran serta aktif Saudara atau perwakilan pejabat/staf yang menangani isu terkait untuk hadir pada rapat dimaksud. Untuk konfirmasi kehadiran dan informasi lebih lanjut dapat menghubungi Saudari Riska Muliawati (0813-7190-4746) .

Demikian, atas perhatian dan kerja sama Saudara diucapkan terima kasih.

Ditandatangani secara elektronik oleh
Sekretaris Direktorat Jenderal Perkebunan,

Heru Tri Widarto, S.Si, M.Sc
NIP 19720412 199903 1 004

Tembusan:
Direktur Jenderal Perkebunan

DAFTAR UNDANGAN

Kepada Yth.:

Kementerian Pertanain

1. Direktur Perlindungan Perkebunan;
2. Direktur Kelapa Sawit dan Aneka Palma;
3. Direktur Tanaman Semusim dan Tahunan;
4. Direktur Hilirisasi Hasil Perkebunan;
5. Kepala Pusat Perakitan dan Modernisasi Pertanian Perkebunan.

Kementerian/Lembaga

1. Direktur PT. Riset Pekebunan Nusantara;
2. Direktur Penyaluran Dana Sektor Hulu, BPDP;
3. Pusat Studi Sawit IPB;
4. Ketua GAPKINDO.

Dokumen ini telah ditandatangani secara elektronik menggunakan sertifikat elektronik
yang diterbitkan oleh Balai Besar Sertifikasi Elektronik (BSrE), Badan Siber dan Sandi Negara (BSSN).

KOORDINASI TEKNIS PENYUSUNAN POSISI DELRI
UNTUK PROPOSAL THAILAND
"*Value-Added Agroforestry Systems for Rubber and Palm Oil under Carbon Credit*"
dalam Kerangka Kerja Sama IMT-GT
Rabu, 15 Juli 2026

I. Latar Belakang dan Tujuan

Menindaklanjuti hasil 19th IMT-GT *Strategic Planning Meeting*: WGAA *Breakout Session* yang telah dilaksanakan pada 25 Februari 2026, Pemerintah Thailand menyampaikan proposal proyek berjudul "*Value-Added Agroforestry System (Rubber and Palm Oil) under Carbon Kredit*" (proposal terlampir). Tujuan proposal proyek tersebut adalah untuk memperkuat kerja sama regional melalui pengembangan *common framework* terkait kredit karbon dalam sistem agroforestri pada komoditas karet dan kelapa sawit. Kegiatan proyek dimaksud antara lain penyelenggaraan *regional workshop, kegiatan scoping studies,* serta implementasi awal kegiatan *pilot agroforestry*, dengan durasi tiga bulan (Oktober – Desember 2026). Setiap Negara akan diminta untuk mendanai pelaksanaan kegiatan di masing-masing negaranya, serta menanggung biaya perjalanan dan akomodasi pada regional workshop yang akan diselenggarakan di Thailand.

Koordinasi ini diselenggarakan dalam rangka penyusunan masukan teknis dari Direktorat Kelapa Sawit dan Aneka Palma, Direktorat Tanaman Semusim dan Tahunan, Direktorat Perlindungan Perkebunan, serta Direktorat Hilirisasi Hasil Perkebunan sebagai bahan penyusunan posisi resmi Delegasi Republik Indonesia (DELRI) yang akan disampaikan pada Pertemuan ke-19 *IMT-GT Working Group on Agriculture* (WGAA) pada tanggal 22 Juli 2026 di Medan. Hasil rapat juga akan disampaikan kepada Biro Kerja Sama Pertanian selaku *focal point* Indonesia untuk IMT-GT.

Masukan teknis dari Direktorat Jenderal Perkebunan sangat penting untuk memperkuat posisi Indonesia dalam penyusunan proposal proyek terkait standardisasi dan implementasi kredit karbon pada komoditas kelapa sawit dan karet di wilayah IMT-GT. Peran aktif dalam menentukan posisi Indonesia pada pertemuan WAGG menjadi kunci utama guna memastikan bahwa output dan aktivitas proyek tersebut benar-benar akomodatif terhadap kebutuhan nasional. *Common Framework* yang dihasilkan tidak sekadar mengadopsi kerangka kerja negara lain khususnya Thailand sebagai pengusul, melainkan mampu mengintegrasikan metodologi dan standar yang mencerminkan kondisi riil pekebun rakyat Indonesia. Langkah strategis ini diharapkan dapat menghasilkan standar yang berkelanjutan dan berdaya guna bagi petani kelapa sawit serta karet di wilayah kerja sama IMT-GT di masa depan.

Dokumen ini telah ditandatangani secara elektronik menggunakan sertifikat elektronik
yang diterbitkan oleh Balai Besar Sertifikasi Elektronik (BSrE), Badan Siber dan Sandi Negara (BSSN).

II. Susunan Acara

Waktu	Kegiatan
09.00 – 09.30	Pembukaan dan penyampaian konteks (status proposal, posisi awal Indonesia, tujuan rapat)
09.30 - Selesai	Pendalaman per direktorat (Direktorat SAP, Direktorat TST, Ditlinbun, dan Direktorat HHP)
	Pembahasan prioritas komoditas, sinergi program domestik, dan keselarasan program
	Perumusan kesimpulan dan rancangan masukan
	Penutup dan penegasan tindak lanjut

III. Pokok Bahasan per Direktorat

A. Direktorat Kelapa Sawit dan Aneka Palma dan Direktorat Tanaman Semusim dan Tahunan

1. Tema pembahasan atau Aktivitas yang dapat diusulkan dalam lingkup workshop dan *scoping study* 2026, termasuk data dan informasi komoditas yang perlu dipetakan;
2. Output dan outcome yang diharapkan dan keterkaitannya dengan Rencana Strategis dan Indikator Kinerja Utama Direktorat Jenderal Perkebunan;
3. Elemen teknis yang perlu tercermin dalam kerangka kerja bersama (*common framework*), khususnya yang mencerminkan kondisi petani kecil (*smallholder)* di Indonesia.

B. Direktorat Perlindungan Perkebunan

4. Informasi dan pengalaman teknis dari pembahasan kredit karbon bidang perkebunan yang relevan dengan proposal dimaksud;
5. Standar atau metodologi pengukuran karbon yang telah digunakan dan dapat menjadi rujukan posisi Indonesia dalam penyusunan *common framework*;
6. Masukan pelengkap atas pokok bahasan yang disampaikan oleh direktorat pengampu komoditas.

C. Direktorat Hilirisasi Hasil Perkebunan

7. Komponen nilai tambah (*value-added*) produk turunan karet dan sawit yang relevan dengan agenda hilirisasi Direktorat Jenderal Perkebunan dan dapat disandingkan dengan skema kredit karbon yang diusulkan;
8. Status pembahasan isu serupa pada jalur Project Implementation Team (PIT) IMT-GT Palm Oil Cooperation (POC), termasuk posisi Indonesia yang pernah disampaikan pada jalur tersebut, guna memastikan keselarasan dengan posisi yang akan disampaikan pada jalur WGAA;
9. Keterkaitan dengan standar atau sertifikasi produk hilir karet dan sawit yang dapat diperkuat melalui pengakuan kredit karbon;
10. Usulan mekanisme koordinasi antara jalur WGAA dan jalur POC untuk isu-isu yang beririsan di kedua jalur tersebut.

Dokumen ini telah ditandatangani secara elektronik menggunakan sertifikat elektronik
yang diterbitkan oleh Balai Besar Sertifikasi Elektronik (BSrE), Badan Siber dan Sandi Negara (BSSN).

IV. Output

Rumusan masukan teknis yang mencakup:

a) Aktivitas yang diusulkan;
b) Output atau outcome dan keterkaitannya dengan kinerja Direktorat Jenderal Perkebunan;
c) Elemen yang perlu tercermin dalam common framework;
d) Prioritas komoditas dan rasionalnya;

Dokumen ini telah ditandatangani secara elektronik menggunakan sertifikat elektronik
yang diterbitkan oleh Balai Besar Sertifikasi Elektronik (BSrE), Badan Siber dan Sandi Negara (BSSN).

APPENDIX 4

Full Project Proposal Template for Non-Infrastructure Projects

IMT-GT Full Project Proposal Template
(maximum of 12 pages)

1. PROJECT DETAILS				
Project title:	Value-Added Agroforestry Systems for Rubber and Palm Oil under Carbon Credit			
Working Group	☐ Transport and Energy			
	☐ Trade and Investment			
	✓ Agriculture			
	☐ Halal products/services			
	☐ Tourism			
	☐ Human Resources Development			
	☐ Others, please specify:			
Proposed project duration	Start date: Q4 2026		End date: Q4 2026	
Coverage/target countries	Indonesia, Malaysia, Thailand			
2. PROPONENT PROFILE				
Organization:	Rubber Authority of Thailand (RAOT)			
Address:	67/25 Bangkhunnon Rd. Bangkok-noi, Bangkok 10700			
Telephone:	Fax:		E-mail:	lr.raot@gmail.com
Type of business:	State Enterprise			
Principal contact person:				
Name:	Mr. Phruek Pupech			
Position:	Foreign Relations Officer, Level 4			
Telephone: +66 65 0035353	E-mail:	lr.raot@gmail.com		
Declaration:	✓ This project concept was developed in accordance with the IMT-GT Project Manual. ☐ This project concept was developed based on other governing guidelines. Please specify: _____

3. PROJECT PROPOSAL
SECTION 1: PROJECT BACKGROUND
1.1 Project Summary and Context s *Briefly summarize* the description of the project. s *Briefly outline recent development trends, context, and setting.* s *Brief description of any past projects or curr*ent initiatives that the intended project will build upon. The agricultural sector, particularly rubber and palm oil, represents a key economic pillar for IMT-GT Member Countries, namely Indonesia, Malaysia, and Thailand. However, the sector is increasingly challenged by climate change, market volatility, and more stringent international sustainability requirements, including the European Union Deforestation Regulation (EUDR). To address these challenges, there is a need to promote the transition from monoculture farming systems to diversified, high-value, and low-carbon agroforestry systems, integrated with internationally recognized carbon credit mechanisms. These challenges are subregional in nature, as IMT-GT Member Countries share similar agricultural structures, export markets, and climate commitments. Addressing them under the IMT-GT framework would enable the development of harmonized approaches, knowledge sharing, and coordinated regional actions. Building upon Thailand's previously proposed concept on Value-Added Agroforestry Systems under Carbon Credit, and in line with the WGAA Meeting recommendations, this project focuses on strengthening regional collaboration through the development of a common framework on carbon credit for agroforestry. The project will be implemented through a regional workshop, followed by scoping studies and pilot implementations in participating countries. The project aims to develop a practical and scalable regional model by promoting a common framework and testing its application through pilot sites in IMT-GT Member Countries, thereby enhancing regional cooperation and supporting sustainable agricultural transformation.
1.2 Project Rationale s *Why should the project be undertaken?* s *Summarize the specific development problem or constraint that the project aims to address. Is the problem or constraint subregional in nature?* s *Can the problem or constraint and its causes be effectively and appropriately addressed at the IMT-GT level?* This project aligns with IMT-GT Vision 2036 and the Implementation Blueprint 2022–2026, particularly in the agriculture sector and Green Economy initiatives.
SECTION 2: PROJECT DESCRIPTION AND APPROACH
2.1 Project Relevance and Alignment s *Specify which subregional plan or agreement that the project intends to address.* s *How will the project contribute to deliver the goals and objective of the subregional plan or agreement?* s *Which strategic pillar/section/measure of the subregional plan or agreement that the project aims to address?* This project aligns with the IMT-GT Vision 2036 and the Implementation Blueprint 2022–2026, particularly under the Agriculture sector and Green Economy initiatives. It contributes to the promotion of low-carbon agriculture in the rubber and palm oil sectors and supports the development of a foundation for a regional carbon credit framework within IMT-GT. The project addresses the strategic priority of enhancing sustainable agricultural practices, strengthening regional cooperation, and promoting environmentally sustainable economic development in the subregion.

Table *continued*

2.2 Impacts

s *Briefly describe the project's expected impact. For example, is it going to increase bilateral trade between Province A in Malaysia and Province B in Thailand?*

Note: Impacts are the long-term and broader changes that occur within IMT-GT's community/ organization/society/environment contributed by the project outcome. In some cases, impacts may only come 5 to 10 years after the outcome has been attained.

Strengthened regional transition towards low-carbon agriculture and the establishment of a foundation for a regional carbon credit framework within IMT-GT.

2.3 Outcome

s *Briefly describe one major outcome the project intends to accomplish. For example, is it going to improve land connectivity between Province A in Malaysia and Province B in Thailand?*

Note: Outcomes are the short-term and intermediate changes that occur after the project outputs have been successfully delivered/completed.

A common framework on carbon credit for agroforestry is developed and applied through pilot implementation in IMT-GT Member Countries, and is ready for replication and scaling.

2.4 Outputs

s *Briefly describe the project's outputs (what are the deliverables). For example, is the output a trans-boundary highway rehabilitated, a policy document adopted, staff skills upgraded, etc?*

- One regional workshop conducted to develop common principles on carbon credit for agroforestry with participation from IMT-GT Member Countries.
- Scoping studies conducted in IMT-GT Member Countries based on the agreed common framework.
- One pilot agroforestry site established in each participating country.
- A consolidated regional project report with key findings and recommendations for regional scaling.

2.5 Activities

s *Briefly describe the project's major activities. In other words, what specifically is the project going to do? Is it going to construct a highway, train people, develop policy, draft legislation, conduct survey, etc?*

- Organize a regional workshop hosted by Thailand, with participation from Indonesia and Malaysia, to develop a common framework on agroforestry and carbon credit mechanisms.
- Conduct scoping studies in each participating country to assess feasibility and identify suitable pilot areas based on the agreed common framework.
- Establish and implement small-scale pilot agroforestry sites in each participating country.
- Monitor and evaluate pilot implementation across participating countries, and prepare a consolidated regional project report with key findings and recommendations.

2.6 Beneficiaries

s *Briefly outline the relevant beneficiaries.*

- Rubber and palm oil farmers in participating countries through improved knowledge and practices on agroforestry and low-carbon agriculture
- Government agencies in IMT-GT Member Countries through enhanced capacity, policy alignment, and strengthened regional cooperation
- IMT-GT Member Countries through the availability of a common framework and pilot models that can be adapted and scaled up at the subregional level
- Relevant stakeholders in the agricultural sector, including practitioners and technical experts, through knowledge exchange and participation in pilot implementation

Table *continued*

2.7 Stakeholders

- *Briefly outline the stakeholders to be engaged.*
- *Briefly explain how the stakeholders will be engaged.*

- Ministry of Agriculture and Cooperatives (Thailand), serving as the main coordinating agency, responsible for policy direction, overall supervision, and facilitating coordination among IMT-GT Member Countries.
- Rubber Authority of Thailand (RAOT), acting as the lead implementing agency, responsible for overall project management, coordination, and execution of activities
- Relevant agricultural agencies from Indonesia and Malaysia, participating in the regional workshop, contributing to the development of common principles, and implementing scoping studies and pilot activities in their respective countries.
- CIMT and WGAA, providing policy guidance and facilitating coordination within the IMT-GT framework.
- Farmers and local communities in pilot areas in participating countries, participating in pilot implementation and providing practical insights.
- Technical experts and academic institutions, supporting the project through knowledge sharing, research, and technical advisory.

Table *continued*

SECTION 3: PROJECT EFFECTIVENESS

3.1 Implementation Arrangements

- *Proposed executing/implementing agency.*
- *Linkages with other relevant IMT-GT fora, initiatives, etc.*
- *Relevant committees or steering groups to be set up as part of the project implementation.*

The project will be implemented under the oversight of the Ministry of Agriculture and Cooperatives of Thailand, which will serve as the main coordinating agency, providing policy direction and facilitating coordination among IMT-GT Member Countries. The Rubber Authority of Thailand (RAOT) will act as the lead implementing agency, responsible for overall project management, coordination, and execution of project activities.

The project will be carried out in close coordination with relevant agricultural agencies from Indonesia and Malaysia, particularly through the IMT-GT Working Group on Agriculture and Agro-Based Industry (WGAA). Participating countries will contribute to the development of common principles and implement scoping studies and pilot activities in their respective countries.

CIMT will provide overall policy guidance and support coordination at the IMT-GT level. No additional formal committee will be established; however, regular coordination and consultation mechanisms will be conducted among stakeholders throughout the project implementation.

3.2 Work Plan

- *Provide expected start and completion dates.*
- *Timeline of outputs.*
- *Timeline of activities.*

The project is expected to be implemented over a three-month period from October to December 2026. Given the pilot and subregional nature of the project, activities will be implemented in a structured and sequential manner to ensure effective coordination among IMT-GT Member Countries and timely delivery of outputs. The work plan and timeline of activities and outputs are outlined as follows:

- **October 2026:** Project preparation and coordination among stakeholders, including confirmation of participation from IMT-GT Member Countries, initial consultations, and preparation of technical materials.
- **November 2026:** Organization of a regional workshop hosted by Thailand to develop common principles and a common framework on agroforestry and carbon credit mechanisms.
- **November–December 2026:** Conduct of scoping studies in each participating country to assess feasibility and identify suitable pilot areas based on the agreed common framework.
- **Late November – December 2026:** Establishment and initial implementation of pilot agroforestry activities in each participating country
- **December 2026:** Monitoring and evaluation of pilot implementation across participating countries, and preparation of a consolidated regional project report with key findings and recommendations.

3.3 Potential Risks

- *Briefly summarize what potential risks may arise and relevant mitigating measures to manage the risks.*

No.	Risks	Mitigating measures
1	Limited time for project implementation within a short timeframe.	Implement a structured and phased work plan, and prioritize key activities.
2	Constraints in participation from IMT-GT Member Countries due to scheduling, travel limitations, or global geopolitical uncertainties.	Utilize flexible meeting arrangements, including on-site coordination and early scheduling with participating countries.
3	Limited technical data or experience on agroforestry and carbon credit mechanisms.	Engage technical experts and relevant institutions to provide guidance and support.

Table *continued*

3.4 Results-Based Monitoring

- *This matrix provides the framework of a results-based monitoring and evaluation. It is to be completed with guidance from CIMT.*

Type of Result	Indicators or Performance Targets	Data Sources	Assumptions and Risks
Impact	Enhanced regional alignment on low-carbon agriculture and development of a foundation for a regional carbon credit framework within IMT-GT.	Regional reports, policy discussions, stakeholder feedback	Continued commitment of IMT-GT Member Countries and supportive policy environment.
Outcome	A common framework on carbon credit for agroforestry is developed and applied through pilot implementation in IMT-GT Member Countries.	Workshop report, scoping study reports, pilot documentation from three countries	Active participation and collaboration from all Member Countries.
Outputs	- Regional workshop conducted to develop common principles on carbon credit for agroforestry. - Scoping studies conducted in three countries based on agreed framework. - One pilot site established in each participating country. - Consolidated regional project report prepared with recommendations.	Workshop report, scoping study reports, pilot records, final report	Activities are implemented as planned and coordination among countries is effective.

Note: To be completed with guidance from CIMT.
Results-based monitoring and evaluation focuses on the higher-level outcome and impact instead of lower-level outputs, activities, or inputs. The matrix guides the framework of a results- based monitoring and evaluation exercise.

3.5 Sustainability

- *Describe how the project will continue to have an impact after the completion of the project.*
- *How will the relevant stakeholders and beneficiaries internalize the results and lessons from the project?*
- *What are the opportunities for future projects to build on the outputs and outcomes of the project?*

The sustainability of the project will be ensured through the development of a common framework on agroforestry and carbon credit mechanisms among IMT-GT Member Countries, which can be further adopted and refined beyond the project period.
The knowledge, technical inputs, and lessons learned from the regional workshop, scoping studies, and pilot implementations will be documented and shared among participating countries. Relevant stakeholders, including government agencies, farmers, and technical experts, will be able to internalize these results through continued application, policy integration, and knowledge exchange platforms under the IMT-GT framework.
The pilot models established in participating countries will serve as practical references for future expansion. The project also creates opportunities for scaling up to larger initiatives, including the development of regional carbon credit mechanisms, integration into national policies, and potential collaboration with international partners and funding agencies.

SECTION 4: FUNDING

4.1 Proposed Project Budget Allocation

Description	Estimated Budget ($)	% Share of the Total Budget
1. Personnel	6,300	11%
2. Equipment/materials	3,400	6%
3. Meetings/workshops/ trainings	22,900	40%
4. Reports	4,600	8%
5. Travel	8,600	15%
6. Dissemination	2,900	5%
7. Others (Pilot implementation support)	8,300	15%
Total	57,000 USD	100%

4.2 Funding Source

✓ National/provincial/state government

☐ Private sector

☐ International

☐ Others: _____
