

Nomor : HM 02.03/43 /BKP.1/UND/04/2026
Sifat : Biasa
Lampiran : 1 (satu) berkas
Hal : Undangan TradePAG #10 2026

Jakarta, 07 April 2026

Yth. (daftar terlampir)

Sebagai bagian dari kerja sama antara Badan Kebijakan Perdagangan (BKPerdag) Kementerian Perdagangan dengan *Economic Research Institute for ASEAN and East Asia* (ERIA) serta *Centre for Strategic and International Studies* (CSIS) Indonesia, maka akan dilaksanakan kegiatan *Trade Policy Advisory Group* (TradePAG) ke-10 tahun 2026 dengan tema ***"Navigating the EUDR: Challenges and Opportunities for Indonesia's Trade"***, yang akan diselenggarakan pada:

Hari/Tanggal : Kamis, 16 April 2026
Waktu : Pukul 09.00 – 16.00 WIB
Tempat : Park Hyatt Hotel Jakarta, Observatory Room, Lantai 36
Jl. Kebon Sirih Nomor 17-19, Jakarta 10340

Kegiatan ini bertujuan untuk membahas implikasi *European Union Deforestation Regulation* (EUDR) terhadap perdagangan Indonesia, termasuk tantangan yang dihadapi serta peluang yang dapat dimanfaatkan dalam mendukung daya saing perdagangan nasional.

Sehubungan dengan hal tersebut, kami mengundang Saudara atau pegawai yang mewakili dalam acara dimaksud. Mengingat keterbatasan tempat, undangan hanya berlaku untuk 1 (satu) orang. Adapun konfirmasi kehadiran diharapkan dapat kami terima paling lambat hari Senin, 13 April 2026 melalui link <https://kemend.ag/kehadirantradepag2026>. Untuk informasi lebih lanjut, dapat menghubungi Sdri. Areta (081233696854).

Demikian, atas perhatian dan partisipasi Saudara, kami ucapkan terima kasih.

Sekretaris Badan Kebijakan Perdagangan,

Muhammad Suaid Sulaiman

Tembusan:

Pt. Kepala BKPerdag (sebagai laporan)

Lampiran Undangan

Nomor : HM.02.03/49 /BKP.1/UND/04/2026

Tanggal : 07 April 2026

DAFTAR UNDANGAN

ASOSIASI

1. Ketua Umum Gabungan Pengusaha Kelapa Sawit Indonesia (GAPKI)
2. Ketua Umum Asosiasi Kakao Indonesia (ASKINDO)
3. Ketua Umum Gabungan Perusahaan Karet Indonesia (GAPKINDO)
4. Ketua Umum Asosiasi Pengusaha Kayu Gergajian dan Kayu Olahan (APKGOI)
5. Ketua Umum Asosiasi Eksportir Kopi Indonesia (AEKI)

KEMENTERIAN/LEMBAGA

6. Asisten Deputi Fasilitas Perdagangan dan Pengembangan Ekspor, Kementerian Koordinator Bidang Perekonomian

NAVIGATING THE EUDR:
CHALLENGES AND OPPORTUNITIES FOR INDONESIA'S TRADE
Collaboration of Trade Policy Agency of the Ministry of Trade with
ERIA and CSIS

A. BACKGROUND

The European Union Deforestation Regulation (EUDR) is a critical policy that will significantly impact Indonesia's trade and economic landscape. As a major exporter of commodities such as palm oil, timber, coffee, cocoa, and rubber, Indonesia must comply with the EUDR's strict sustainability and traceability requirements to maintain its access to the EU market. The EU is one of Indonesia's key trading partners, and failure to meet these regulations could lead to trade restrictions, potentially harming the country's export revenues and affecting millions of livelihoods, particularly smallholder farmers who rely on agricultural exports. Ensuring compliance with the EUDR is essential for Indonesia to sustain its competitive position in the global market.

Beyond economic concerns, navigating the EUDR is also crucial for Indonesia's environmental and sustainable development commitments. As one of the world's most biodiverse nations, Indonesia has been under international scrutiny for deforestation and land-use changes linked to commodity production. Aligning with the EUDR will reinforce Indonesia's commitment to global actions, such as Nationally Determined Contributions (NDCs) under the Paris Agreement, Kunming-Montreal Biodiversity frameworks and Sustainable Development Goals (SDGs). Strengthening sustainability measures not only enhances Indonesia's environmental governance but also attracts responsible investment and improves its standing in international trade.

Moreover, the EUDR presents an opportunity for Indonesia to reform its agricultural and forestry sectors through improved sustainability standards, certification systems, and digital traceability solutions. Implementing robust monitoring and compliance mechanisms, such as expanding ISPO (Indonesian Sustainable Palm Oil) and SVLK (Timber Legality Verification System), will enhance the credibility of Indonesian products. Learning from other countries that have successfully navigated similar trade regulations, such as Brazil's Soy Moratorium and Malaysia's MSPO certification, can help Indonesia develop an effective strategy for sustainable trade. However, the EUDR also poses significant challenges for Indonesia, including complexity of diversified supply chain standards, data collection, governance and verification hurdles, and potential negative economic impacts on small hold farmers and foresters.

In terms of regulatory requirements, Indonesia must actively advance its commitment to sustainable, inclusive and green trade. Developing a comprehensive green trade policy that integrates sustainability principles into export strategies will be essential for long-term resilience. This includes promoting eco-friendly agricultural practices, incentivizing

low carbon supply chains, and ensuring that smallholder farmers receive adequate support to transition toward sustainable production. Strengthening green trade initiatives will not only help Indonesia comply with global sustainability standards but also unlock new market opportunities, particularly in regions with increasing demand for environmentally responsible products. However, the implementation of EUDR introduces challenges on cost of transitions.

Through a limited revision, the implementation of the EUDR has been further postponed and is now scheduled to take effect on 30 December 2026 for large companies and 30 June 2027 for MSMEs. On a policy level, Indonesia must proactively engage in diplomatic and trade negotiations with the EU to ensure fair and practical implementation of the EUDR, particularly accommodating smallholder farmers who may struggle with compliance. The postponement presents an opportunity for the government and business actors to enhance their preparedness to comply with the EUDR, including strengthening the readiness of certification and traceability systems to meet the requirements of the due diligence statement. A well-planned roadmap that integrates government support, private sector initiatives, and international collaboration will be key to minimizing trade disruptions while fostering green growth.

A crucial aspect to achieving this is by continuously having an open dialogue amongst the government entities, private sectors, research institutions, and international organizations that will bring together leading experts to explore potential trade policy solutions in order to navigate the EUDR. For this reason, Trade Policy Agency (TPA) of the Ministry of Trade will collaborate with the Economic Research Institute for ASEAN and East Asia (ERIA) and the Centre for Strategic and International Studies (CSIS) Indonesia to organize the Trade Policy Advisory Group (TradePAG) forum with the title of “Navigating the EUDR: Challenges and Opportunities for Indonesia’s Trade.” The forum aims to bring together experts to provide insights and evidence on Indonesia’s current performance as well as that of other countries. This TradePAG is also expected to generate recommendations on the strategic actions that the Ministry of Trade needs to implement.

B. AIM AND OBJECTIVES

In response to the complex challenges policy makers face, one strategic way of addressing the issue is to create a well-resourced network of policy issue experts working closely with the government. This group of experts is called TradePAG will provide tailored advice directly to the Minister of Trade to support evidence-based policymaking. TradePAG is collaboratively organized by the Trade Policy Agency of the Ministry of Trade, the Economic Research Institute for ASEAN and East Asia (ERIA), and partner university/think tank.

The discussion aims to formulate policy and strategic solutions for the Government of Indonesia, particularly the Ministry of Trade, to address the challenges in responding to the EUDR, especially those related to data readiness, traceability systems, and transparent and sustainable supply chain governance that support market access for Indonesia’s export products.

C. PARTICIPANTS

Participants will primarily consist of invited participants from the Ministry of Trade Republic of Indonesia and other relevant ministries and institutions. However, depending on the agreement of TPA, ERIA and CSIS, participants may also include other stakeholders involved in the policy making of the specific topic being discussed.

D. AGENDA

Tentative Rundown - TradePAG
NAVIGATING THE EUDR:
CHALLENGES AND OPPORTUNITIES FOR INDONESIA'S TRADE
Date: Thursday, 16 April 2026

TIME (WIB)	ACTIVITY	PIC
	FULL DAY ACTIVITY – D DAY	
09.00 - 09.05	Opening	MC
09.05 - 09.10	Welcome Speech DG for Research and Policy Design, ERIA	ERIA
09.10 - 09.20	Remarks Head of Trade Policy Agency, Ministry of Trade ERIA	TPA
09.20 - 09.25	Group Picture	MC
	Morning Session	
09.25 - 10.15	<i>Presentation from Key Experts: 30 minutes</i> <i>Views from discussants: @10 minutes</i> Key Expert 1: “Harmonizing Sustainability and Economic Growth: Navigating EUDR and Global Trade Policies” Michaela Summerer (TBC) Policy Analyst, Trade and Environment, International Trade Center (ITC) Points of discussion • Balancing Environmental Objectives of EUDR with Economic Growth in Trade Regulations a. How EUDR aligns with global environmental goals and its implications for developing economies like Indonesia, especially from agricultural countries such as Australia, Thailand and Malaysia. b. Specific EUDR requirements and institutional innovations that needs to be fulfilled and impacts of non-compliance. c. The importance of global cooperation in creating sustainable trade policies especially on how to support the need for traceability and certification. • Supporting trade finance for Sustainable Supply Chains to Ensure Market Access a. How international organisations such as ITC can assist Indonesia in developing sustainable supply chains that comply with EUDR requirements. b. Opportunities for international funding, trade finance and technical support to help Indonesian producers transition towards more sustainable production and consumption practices.	Moderator: Yose Rizal Damuri (Executive Director, CSIS Indonesia) Discussant: Dr. Venkatachalam Anbumozhi (Senior Research Fellow for Innovation, ERIA) Contributors: CSIS Indonesia

TIME (WIB)	ACTIVITY	PIC
10.15 – 10.40	Question and Answer Session for Part #1	Moderator: Yose Rizal Damuri (Executive Director, CSIS Indonesia) Discussant: Moh Faisal (Executive Director, CORE Indonesia) Contributors: CSIS Indonesia
10.40 – 11.30	Key Expert 2: EUDR Global Diplomacy: Opportunities and Challenges H.E. Nur Rakhman Setyoko (tbc) Deputy II Permanent Representative / Ambassador, Permanent Mission of Republic of Indonesia in Geneva Points of discussion • Current Global Condition for Free, Fair and Environmentally Sustainable Trade a. What are the global trade trends and economic outlook? b. Geopolitical tensions and impact to trade agreements. c. Rising protectionist policies (tariff, export bans, subsidies) and impact to Indonesia, especially an overview of EUDR. • Diplomatic Engagements to Address EUDR Compliance Challenges a. How Indonesia is engaging in diplomatic negotiations with the European Union to ensure fair trade practices while addressing sustainability concerns. Explains the measures that have already been undertaken and identifies areas that need to be further strengthened, including strategic solutions.	
11.30 – 12.00	Question and Answer Session for Part #2	
12.00 – 13.30	BREAK	
	Afternoon Session	
13.30 - 14.20	<i>Presentation from Key Experts: @30 minutes</i> <i>Views from discussants: @10 minutes</i> Key Expert 3: "Border carbon adjustments to support low-carbon industry development: Australia's Carbon Leakage Review" Professor Frank Jotzo Professor and Director Centre for Climate and Energy Policy, ANU Crawford School of Public Policy, Australia and Lead for the Carbon Leakage Review for Australia's Government. Points of discussion • Australia's Approach to Sustainable Trade: Lessons for Indonesia a. Australia's climate policies and how decarbonization in the industry and resources	Moderator: Dandy Rafitrandi (Researcher Department of Economics, CSIS Indonesia) Discussants: Dr. Risti Permana (Senior Lecturer, University of Queensland)

TIME (WIB)	ACTIVITY	PIC
	sector is to be achieved. b. How Australia aligns climate policy, industrial strategy, and trade policy under a coherent framework. c. How Australia engages with major partners to be align with the climate policy implemented. d. The potential for Indonesia to strengthen trade partnerships with Australia as an alternative market for key commodities.	Contributors: CSIS Indonesia
14.20 – 14.45	Question and Answer Session for Part #3	
14.45 – 15.35	Key Expert 4: "Ensuring Compliance and Sustainability: Indonesia's Commodity Producers in the Face of EUDR Challenges" Dr. Fadhil Hasan (tbc) (Founder Institute for Development of Economics and Finance/INDEF) <i>Points of discussion</i> • Challenges and Readiness of Indonesia's Commodity Producers to Meet EUDR Standards a. The practical difficulties Indonesia's commodity producers face in complying with EUDR regulations. b. The potential impact on smallholder farmers and the overall commodities supply chain. • Trade and Industry-Led Sustainability Efforts to Maintain Global Market Access a. Steps taken by Indonesia's commodity producers to align with international sustainability standards. b. The role of certification systems (ex. ISPO, RSPO) and traceability measures in ensuring compliance with EUDR requirements. c. Overview strategy for Indonesia in navigating the EUDR.	Moderator: Dandy Rafitrandi (Researcher Department of Economics, CSIS Indonesia) Discussants: Elyse Kneller (Associate at Nishimura and Asahi Law Firm) Contributors: CSIS Indonesia
15.35 – 16.00	Question and Answer Session for Part #4	
16.00 – 16.05	Closing	Moderator & MC
